Opestive said is the Plature Transed Chaing Progress: 100	is; show sizes, we is, and all other is diffe	sights, and lengths of proposed sasings; indicate mudding jobs, coment- important proposed work) Formation anticipated at approximately 2050.
Objective same is the Floture Orogened Casing Program: 100 2050	of 9 5/10 of 9 5/10 of 9 5/10	Septembles of proposed easings; indicate mudding jobs, coment-important proposed work) Formation anticipated approximately 2050. 8° J-55 Comented to the Surface. J-55 Comented with 150 Sects.
Objective sand is the Floture Progress: 100 2050	of 9 5/10 of 9 5/10 of 9 5/10	ights, and lengths of proposed casings; indicate mudding jobs, coment- important proposed work) Formation anticipated approximately 2050; By J-55 Casented to the Surface.
orgonaed Casing Program: 100 2050 Not ry tools will be employed	of 9 5/1 of 5 %	sights, and lengths of proposed savings; indicate mudding jobs, coment- important proposed work) Formation anticipated at approximately 2050; 8° J-55 Comented to the Surface. J-55 Comented with 150 Sacks. surface to to of fetured liffs.
orgonaed Casing Program: 100 2050 Not ry tools will be employed	of 9 5/1 of 5 %	sights, and lengths of proposed easings; indicate mudding jobs, comentimportant proposed work) Formation anticipated at approximately 2050; 8° J-55 Comented to the Surface. J-55 Comented with 150 Sacks. surface to to of detured lifts. of Fictured lifts to an optimated 77 of
organised Casing Program: 100 2050 Otory tools will be employed	of 9 5/1 of 5 %	sights, and lengths of proposed savings; indicate mudding jobs, coment-important proposed work) Formation anticipated approximately 2050* 8° J-55 Comented to the Surface. J-55 Comented with 150 Sacks. surface to to of Setured Siffs.
Proposed Casing Progress 100 2050 Not ry tools will be employed while Tools will be employed	of 9 5/0 from top	sights, and lengths of proposed easings; indicate mudding jobs, comentimportant proposed work) Formation anticipated at approximately 2050; 8° J-55 Comented to the Surface. J-55 Comented with 150 Sacks. surface to to of fetured lifts. of Fictured lifts to an optimated 77 of 2125;
Proposed Casing Progress 100 2050 Not ry tools will be employed while Tools will be employed	of 9 5/0 from top	sights, and lengths of proposed easings; indicate mudding jobs, coment- important proposed work) Formation anticipated at approximately 2050; 8° J-55 Comented to the Surface. J-55 Comented with 150 Sacks. surface to to of detured lifts. of Fictured lifts to an optimated To of
Proposed Casing Progress 100 2050 Not ry tools will be employed while Tools will be employed	of 9 5/0 from top	sights, and lengths of proposed easings; indicate mudding jobs, comentimportant proposed work) Formation anticipated at approximately 2050; 8° J-55 Comented to the Surface. J-55 Comented with 150 Sacks. surface to to of fetured lifts. of Fictured lifts to an optimated 77 of 2125;
Proposed Casing Program: 100 2050 tot ry tools will be employed to ble Pools will be employed the little be send oil free	of 9 5/0 of	sights, and lengths of proposed easings; indicate mudding jobs, comentimportant proposed work) Formation anticipated at approximately 2050' 8° 3-55 Comented to the Surface. J-55 Comented with 150 Sacks. surface to to of fetured liffs. of Fictured lifts to an entimeted 77 of 2125'. effort to a timulate approximation. RECEIVED
Proposed Casing Program: 100 2050 tot ry tools will be employed to ble Pools will be employed the little be send oil free	of 9 5/0 of	sights, and lengths of proposed easings; indicate mudding jobs, comentimportant proposed work) Formation anticipated at approximately 2050; 8° 3-55 Comented to the Surface. J-55 Comented with 150 Sacks. surface to to of fetured life. of Fictured life to an entimeted 77 of 2125; effort to a timulate approximation. RECEIVED ing by the Geological Survey before operations may be commissed 2 1955.
Proposed Casing Program: 100 2050 Not ry tools will be employed the Pools will be employed. Lively will be sand oil free sunderstand that this plan of work must receive a sand of the s	of 9 5/0 form top	sights, and lengths of proposed easings; indicate mudding jobs, comentimportant proposed work) Formation anticipated at approximately 2050; 8° 3-55 Comented to the Surface. J-55 Comented with 150 Sacks. surface to to of fetured life. of Fictured life to an entimeted 77 of 2125; effort to a timulate approximation. RECEIVED ing by the Geological Survey before operations may be commissed 2 1955.
Proposed Casing Progress 100 2050 Not ry tools will be employed while Tools will be employed	of 9 5/0 form top	sights, and lengths of proposed easings; indicate mudding jobs, comentimportant proposed work) Formation anticipated at approximately 2050' 8° 3-55 Comented to the Surface. J-55 Comented with 150 Sacks. surface to to of fetured liffs. of Fictured lifts to an entimeted 77 of 2125'. effort to a timulate approximation. RECEIVED
Processed Casing Program: 100 2050 Not ry tools will be employed the Tools will be employed. Livell will be sand oil free named that this plan of work must receive a sompany. SCOTIES E UNI N G	is show sizes, we is and all other is d Gliffs of 9 5/ of 9 5/ of 5 is from top sed in an approval in writing	sights, and lengths of proposed easings; indicate mudding jobs, comentimportant proposed work) Formation anticipated at approximately 2050; 8° 3-55 Comented to the Surface. J-55 Comented with 150 Sacks. surface to to of fetured life. of Fictured life to an entimeted 77 of 2125; effort to a timulate approximation. RECEIVED ing by the Geological Survey before operations may be commissed 2 1955.
Proposed Casing Program: 100 2050 Not my tools will be employed to ble Tools will be employed. Evell will be sand oil free sunderstand that this plan of work must receive a sufficient with the sand of the sand oil free sunderstand that this plan of work must receive a sufficient sand oil free	is show sizes, we is and all other is d Gliffs of 9 5/ of 9 5/ of 5 is from top sed in an approval in writing	sights, and lengths of proposed easings; indicate mudding jobs, comentimportant proposed work) Formation anticipated at approximately 2050; 8° 3-55 Comented to the Surface. J-55 Comented with 150 Sacks. surface to to of fetured life. of Fictured life to an entimeted 77 of 2125; effort to a timulate approximation. RECEIVED ing by the Geological Survey before operations may be commissed 2 1955.
recessed Casing Program: 100 2050 Not ry tools will be employed the Pools will be employed. Livell will be sand oil free numbers and that this plan of work must receive a sempany. SCOTIES FURILING	is show sizes, we is and all other is d Gliffs of 9 5/ of 9 5/ of 5 is from top sed in an approval in writing	sights, and lengths of proposed easings; indicate mudding jobs, comentimportant proposed work) Formation anticipated at approximately 2050* 8° 3-55 Comented to the Surface. J-55 Comented with 150 Sacks. surface to to of fetured life. of Fictured life to an entimeted To of 2125*. effort to a timulate approximation. RECEIVED ing by the Geological Survey before operations may be commissed 2 1955.
