LOG OF OIL OR GAS WELL

LOCATE WELL CORRECTLY

3825 Willat Avenue
Culver City, Calif.

Company Jack Sullivan Address Culver City, Calif.
 Lessor or Tract Hill Field Wildcat State N. M.
 Well No. 1 Sec. 20 T. 26N R. 12W Meridian NMPM County San Juan
 Location 660 ft. NE of N Line and 660 ft. E of E Line of Sec. Elevation 6030
(Offset foot relative to sea level)

The information given herewith is a complete and correct record of the well and all work done thereon so far as can be determined from all available records.

Signed L. E. Jones

Date 3-18-53 Title Agent

The summary on this page is for the condition of the well at above date.

Commenced drilling 7-13, 1952 Finished drilling 9-5, 1952

OIL OR GAS SANDS OR ZONES

UNITED STATES
DEPARTMENT OF THE INTERIOR
GEOLOGICAL SURVEY

[illegible]

11/27/2011 12:43:30 PM

1. The first step in the process of the investigation is the identification of the problem. This is done by the investigator who is responsible for the investigation. The investigator must identify the problem and the scope of the investigation.

2. The second step is the collection of data. This is done by the investigator who is responsible for the investigation. The investigator must collect data from the sources that are available to him or her.

3. The third step is the analysis of the data. This is done by the investigator who is responsible for the investigation. The investigator must analyze the data and determine the cause of the problem.

4. The fourth step is the development of a solution. This is done by the investigator who is responsible for the investigation. The investigator must develop a solution to the problem and implement it.

5. The fifth step is the evaluation of the solution. This is done by the investigator who is responsible for the investigation. The investigator must evaluate the solution and determine if it is effective.

6. The sixth step is the documentation of the investigation. This is done by the investigator who is responsible for the investigation. The investigator must document the investigation and the results of the investigation.

7. The seventh step is the communication of the results of the investigation. This is done by the investigator who is responsible for the investigation. The investigator must communicate the results of the investigation to the appropriate parties.

8. The eighth step is the follow-up on the investigation. This is done by the investigator who is responsible for the investigation. The investigator must follow-up on the investigation and determine if the problem has been resolved.

9. The ninth step is the review of the investigation. This is done by the investigator who is responsible for the investigation. The investigator must review the investigation and determine if it was conducted properly.

10. The tenth step is the conclusion of the investigation. This is done by the investigator who is responsible for the investigation. The investigator must conclude the investigation and determine if the problem has been resolved.

[illegible]

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of refilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if recasing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or falling.
