19. SUMMARY REPORT OF

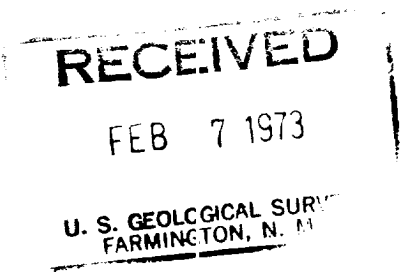

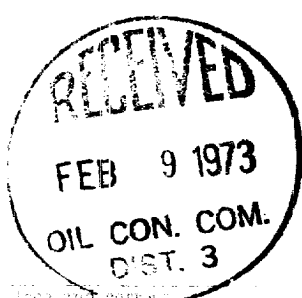

WELL IDENTIFICATION NO.	DEPARTING WELL
NAME OF OPERATOR	ALTERING CASING
SECTION, T. R. M., OR BLK. AND QUARTER OR ABQA	ABANDONMENT

(Date:)

20. SUMMARY OF WELL (See Note 17 below) AND OTHER DATA (See Note 17 below)

Subject well showed signs of communication between tubing and annulus. A service unit was placed on the well and after three days of fishing had recovered only 11 joints of 2-7/8" tubing. Then it appeared the 4-1/2" casing was parted at approximately 140'.

Amoco now proposes to pull whatever 4-1/2" casing will come free above the parted depth. We will then tie on to the 8-5/8" intermediate string and pump 1000 sacks of regular cement. This is 23% excess over all open volumes. A proper abandonment marker will be erected and the location cleaned.

21. NAME OF OPERATOR (See Note 17 below) AND OTHER DATA (See Note 17 below)
Original Signed by **J. Arnold Smith**

22. AREA ENGINEER
February 5, 1973

23. DATE

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.
