The elevation of the derrick floor above sea level is 6068 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was spudded on July 16, 1957, and on July 17, 1957, 8-5/8" casing was set at 321' with 240 sacks of cement. After waiting on cement for 24 hours, casing and water shut off were tested with 500 pounds pressure for 30 minutes with no drop in pressure.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
