Rollback
(Range)

(Meridian)

Gallagos Gallup

SAN JUAN

New Mexico

Underlined (Field) Dakota

(County or Subdivision)

(State or Territory)

The elevation of the derrick floor above sea level is 6340 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Moved in workover rig and pulled Gallup tubing. Unlatched from Model "D" packer and pulled Dakota tubing. Found hole in tubing at 5411'. Packer seal assembly OK. Ran Dakota tubing and landed at 6248'. Landed Gallup tubing at 5520'. Tested Dakota tubing with 2500 psi for 30 minutes which held with no indication of pressure drop. Details on packer leakage test show effective separation between Gallup and Dakota.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
