(State or Territory)

The elevation of the electric line above sea level is 6238 ft. (ungraded ground)

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

Proposed to drill 100 feet of 2-1/2" casing to 100 feet below the level of the objective sands. The casing is expected between 1,800 and 2,000 feet. The casing is to be drilled through Pickered Hill formation. The casing is to be drilled with solidified silver chloride. The casing is to be drilled with solidified silver chloride.

Casing program: 100 feet of 2-1/2" casing to 100 feet below the level of the objective sands. Cement to surface.

2-1/2" O.D. 100' casing program to be drilled to 100 feet below the level of the objective sands. Cement to surface.

1" casing to be drilled to 100 feet below the level of the objective sands. Cement to surface.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
