DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Old Trading Post Well No. 1 was spudded on May 14, 1958, and on May 15, 1958, 9-5/8" casing was set at 499' with 300 sacks of cement. After waiting on cement for 24 hours, casing and water shut-off were tested with 700 pounds pressure for 30 minutes, which held with no drop in pressure.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
