DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

As a result of not obtaining a commercial oil well Old Trading Post Well #2 has been plugged and abandoned, with abandonment operations completed on January 22, 1960. The plugging procedure was as follows:

1. Spotted 30 sacks cement plug 4735-5095' over Gallup circumferential out and squeezed with minimum pressure.
2. Found casing free at 2005'. Cut off 4-1/2" casing at 2004' with jet cutter.
3. Spotted 20 sacks cement plug 1954-2054' over casing stub and across top of Navajo formation.
4. Filled 4-1/2" casing to 1300'.
5. Spotted 40 sacks cement plug 1800-1300' across top of Pictured Cliffs zone.
6. Filled 4-1/2" casing from hole.
7. Spotted 10 sacks cement plug 0-30' and erected dry hole marker.
8. Filled hole with mud laden fluid between cement plugs.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
