Crandell-Federal

Well No. 1-10 is located 990 ft. from N line and 990 ft. from W line of sec. 10NW/4 Sec. 10
(1/4 Sec. and Sec. No.)T 26 N
(Twp.)R 9 W
(Range)N. M. P. M.
(Meridian)Wildcat
(Field)San Juan County
(County or Subdivision)New Mexico
(State or Territory)The elevation ~~of the land surface shown on map is~~ 6,335 ft. - Ungraded ground

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Propose to drill with rotary tools to the top of the Pictured Cliff Formation - expected between 1,900 feet and 2,100 feet below surface - then drill 4-3/4" rat hole through Pictured Cliff formation. Completion with cable tools - and shooting with solidified nitro glycerin or sand oil fracturing.

Casing program: 100 feet of 8-5/8" new 8 rd. lhd. 32' casing. Circulate cement to surface.

5-1/2" O.D. 14# J-55 seamless casing to be set on top of Pictured Cliffs formation, cemented with 150 sacks regular cement.

1" tubing to be set within 50 feet of total depth for production.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Title

1. The purpose of this study is to determine the effect of the proposed project on the environment. The study will be conducted in accordance with the requirements of the National Environmental Policy Act (NEPA) and the Federal Land Management Policy Act (FLMPA).

2. The proposed project is a new road construction project located in the State of California. The project is a 10-mile long road that will connect the town of San Jose to the town of San Francisco. The road will be constructed on a 100-foot wide right-of-way.

3. The proposed project will have a significant impact on the environment. The road will be constructed through a 100-foot wide right-of-way that contains a variety of natural resources, including trees, shrubs, and grasses. The road will also be constructed through a 100-foot wide right-of-way that contains a variety of cultural resources, including historic buildings and archaeological sites.

4. The proposed project will also have a significant impact on the local economy. The road will provide a new route for traffic between San Jose and San Francisco, which will reduce travel time and increase the efficiency of the transportation system. The road will also provide a new source of revenue for the local government through the collection of taxes on the road.

5. The proposed project will also have a significant impact on the local community. The road will provide a new source of employment for the local community through the construction and maintenance of the road. The road will also provide a new source of revenue for the local government through the collection of taxes on the road.

6. The proposed project will also have a significant impact on the local environment. The road will be constructed through a 100-foot wide right-of-way that contains a variety of natural resources, including trees, shrubs, and grasses. The road will also be constructed through a 100-foot wide right-of-way that contains a variety of cultural resources, including historic buildings and archaeological sites.

7. The proposed project will also have a significant impact on the local economy. The road will provide a new route for traffic between San Jose and San Francisco, which will reduce travel time and increase the efficiency of the transportation system. The road will also provide a new source of revenue for the local government through the collection of taxes on the road.

8. The proposed project will also have a significant impact on the local community. The road will provide a new source of employment for the local community through the construction and maintenance of the road. The road will also provide a new source of revenue for the local government through the collection of taxes on the road.
