(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well has an apparent casing failure. We propose to isolate the casing failure and squeeze cement as required to restore integrity to the well bore. We will then stimulate the Dakota zone with a mud/silt removal (MSR) acid in an attempt to enhance this stripper well's production and then return the well to production.

18. I hereby certify that the foregoing is true and correct
