The elevation of the derrick floor above sea level is **5988** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

We plan to pull the rods & tubing out of this well. We will then install water injection equipment and inject water through the present 5-1/2" OD casing perfor. of 5110-5134' into the Gallup Formation.

This well will be a Water Injection Well for the Gallegos Gallup Sand Unit, which will be operated by Skelly Oil Company.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company **Skelly Oil Company**
