		(Note: Report results of multiple completion on Well Completion or Recompletion Report and I form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If we directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

An inspection was made of the P and A marker for this well on 2/8/00. I believe that the occasional gas bubb are generated from decaying vegetation and not from any gas leaks from the well or nearby flowline. A drainage di was cut up-slope from the marker to divert the water flow and the soil was removed adjacent to the P&A marker. T bubbles stopped around the marker, but they could still be observed at various places away from the marker but s under water. No further action is necessary.

14. I hereby certify that the foregoing is true and correct

**WATER SUPPLY SOURCE**  
**Surface Use Plan**

**Attachment No 1**

Depending on which drilling contractor is used, the water for drilling and completion operations will come from one of the following locations:

1. San Juan River at Blanco Bridge, NW SE SE Section 18, T29N, R9W.
2. 29-6 Waterhole in Unit L, Section 28, T29N, R6W.
3. Navajo Reservoir, SW NW SE Section 14, T30N, R7W.
4. Sims Mesa (SJ #14) NW SW Section 35, T31N, R7W.
5. La Jara Water Hole, Unit M, Section 11, T30N, R6W.
6. Pine River
7. City of Ignacio, CO.
8. Produced Water
9. City of Aztec, NM.
