13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

An inspection was made of the P and A marker for this well on 2/8/00. I believe that the occasional gas bubbles are generated from decaying vegetation and not from any gas leaks from the well or nearby flowline. A drainage ditch was cut up-slope from the marker to divert the water flow and the soil was removed adjacent to the P&A marker. The bubbles stopped around the marker, but they could still be observed at various places away from the marker but still under water. No further action is necessary.

14. I hereby certify that the foregoing is true and correct
