The elevation of the derrick floor above sea level is 6591 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate muddling jobs, cementing points, and all other important proposed work)

Well was spudded at 6:00 A.M., September 6, 1952. On September 6, 1952, 9-5/8" casing was landed at 108 feet and cemented with 90 sacks of cement. Cement circulated to surface. Cement plug down at 12:00 A.M., September 6, 1952. At 12:00 P.M., September 7, 1952, casing and water shut-off were tested at 400 pounds for 30 minutes with no drop in pressure. Twenty-four feet of solid cement were drilled in bottom of pipe and water shut-off was again tested at 400 pounds for 30 minutes. There was no drop in pressure during this test and drilling operations were resumed.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
