Farmington, New Mexico, July 16, 1952

Well No. 9 is located 1690 ft. from (N) line and 1690 ft. from (E) line of sec. 1

<u>NE/4 Section 1</u> (1/4 Sec. and Sec. No.)	<u>T-26-N</u> (Twp.)	<u>R-11-W</u> (Range)	<u>EDPN</u> (Meridian)
<u>Marathon Unit</u> (Field)	<u>San Juan</u> (County or Subdivision)	<u>New Mexico</u> (State or Territory)	

The elevation of the derrick floor above sea level is 6475 ft. (D.L.)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important work.)

We propose to drill the above well to approximately 2200 feet. Rotary tools will be used to total depth. Casing will be set on top of pay. Pictured Cliffs formation will be drilled with gas and cleaned out after shot with gas.

The following casing program is proposed:

Size	Depth	Cement	Remarks
9-5/8"	100	75	175% of calculated amount to circulate
7"	2065	150	100% of calculated amount to fill 1000' above shoe.

Copies of location and elevation plate are attached. A copy of any survey taken will be submitted upon completion of well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
