

NEW MEXICO OIL CONSERVATION COMMISSION
MISCELLANEOUS REPORTS ON WELLS
(Submit to appropriate District Office as per Commission Rule 1106)

COMPANY El Paso Natural Gas Company - Box 997, Farmington, New Mexico
(Address)

LEASE Day WELL NO. 2-B(FM) UNIT M S 7 T 27N R 8W
DATE WORK PERFORMED 6-25-59 POOL Blanco & South Blanco P. C.

This is a Report of: (Check appropriate block) ☐ Results of Test of Casing Shut-off
☐ Beginning Drilling Operations ☒ Remedial Work
☐ Plugging ☐ Other _____

Detailed account of work done, nature and quantity of materials used and results obtained.
The Day No. 2-B (FM) was completed May 5, 1958, and was on production until the packer leakage test was run this year. It was found that there was communication between the Pictured Cliffs and Mesa Verde production. A temperature survey was then run to determine the location of the leak. No tubing leak was detected but the survey showed that the wellhead may have been leaking.

On June 25, 1959, a wire liner truck from B & R Service Co. along with a representative of the National Supply Co. were called to the location. Blind chokes were set in the 1 1/4" and 2" tubing. The bonnet was then removed from the wellhead. It was found that the dual string tubing hanger was leaking, and that the flange spacer ring was missing. The hold-down screws were tightened, but the leak was not stopped. The top float ring was replaced on the 1 1/4" tubing mandrel. A new 2" transition hanger carrier assembly was installed, along with a new flange spacer ring. The bonnet was replaced and the blind chokes pulled.

The well has now been turned over to the Gas Engineering Department for testing.
