RE: Our Graham #1

Gentlemen:

Enclosed herewith is photocopy of material received from El Paso in reply to my letter to them of February 13.

As outlined in copy of my letter of today's date to El Paso, we are arranging to have an additional deliverability test on our Graham No. 1 made at the earliest possible moment.

Yours sincerely,

Charles S. Hale
President

Gentlemen: RE: Our Graham #1 Well

Thank you for your prompt reply to my letter
of February 18.

We are notifying our representative in Farmington, New Mexico, Cline Russell, to arrange for a deliverability test at the earliest possible moment. I am not quite certain from the remarks contained in your last paragraph as to whether or not the deliverability test information should be furnished you by ourselves, or whether the same will be made available to you through your Farmington office.

Thanking you again for your help in this connection, believe me

Yours sincerely,

Charles S. Hale
President

Attention: Mr. Charles S. Hale
President

Gentlemen:

We have received your letter of February 18, 1963, Photocopy of the letter from the Oil Conservation Commission and your reply dated February 18, 1963 pertaining to 1962 deliverability test for your Graham #1 Well.

The test was scheduled for chart period April 2-10, 1962. However, during this period the well produced only 35-hours, which was insufficient for a test. Therefore, the test was busted and was not re-scheduled during 1962. The well was tested during chart period January 7-15, 1963 and we are enclosing herewith, test information for that period which will enable you to complete your 1962 deliverability test to the Commission. A copy of this test information is furnished to the Oil Conservation Offices in Santa Fe and Aztec, New Mexico. The Commission will not permit one deliverability test to be used for two years. Therefore, it will be necessary for you to advise your representative in Farmington, New Mexico, to contact our Mr. Harold Kendrick, Senior Gas and Production Engineer, in Farmington and re-schedule the 1963 deliverability test for your Graham #1 Well.

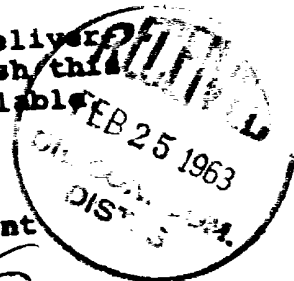

Please be advised that, when requesting deliverability test information, it is necessary to furnish this office the Flow Period, Meter Code Number, if available, or the well name and location.

Yours truly,
Measurement Department
