DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to plug and abandon this well because of a \_\_\_\_\_ casing pipe now at well bottom lost in the hole. The top of the plug is to be \_\_\_\_\_ ft. above the bottom of the casing string or casing pipe.

It is intended to place \_\_\_\_\_ ft. cement plug on top of the plug \_\_\_\_\_ ft. at the surface.

The well will be abandoned to drill another hole on the same section. \_\_\_\_\_ cement will be used in the plug, so make with the plug to set it the way.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
