DI	ETAILS OF MODE
	ETAILS OF WORK
	ETAILS OF WORK now sizes, weights, and lengths of proposed casings; indicate mudding jobs, ceme ad all other important proposed work)
e names of and expected depths to objective sands; shing points, an	now sizes, weights, and lengths of proposed casings; indicate mudding jobs, ceme ad all other important proposed work)
e names of and expected depths to objective sands; shing points, an	now sizes, weights, and lengths of proposed casings; indicate mudding jobs, ceme and all other important proposed work)
e names of and expected depths to objective sands; shing points, an exice of importion to brill, for mally completing as a pictured	now sizes, weights, and lengths of proposed casings; indicate mudding jobs, cemedall other important proposed work) was 9-33ic, detect 3-10-61, was approved for allefte-Substa well. Because of sub-commercial
e names of and expected depths to objective sands; shing points, an	now sizes, weights, and lengths of proposed casings; indicate mudding jobs, cemed all other important proposed work) The P-33ic, detail 3-10-61, was approved for allefte-Substa well. Because of sub-commercial decays of sub-commercial decays and approved to a decay of the complete the
e names of and expected depths to objective sands; she ing points, an otion of importion to brill, friendly completing as a pictured ogging indications of FG, it was	now sizes, weights, and lengths of proposed casings; indicate mudding jobs, cemed all other important proposed work) The P-33ia, detail 3-10-61, was approved for all ffo-Substa well. Because of sub-commercial design and superstant and superstant cases. This was down and reported on
s names of and expected depths to objective sands; she ing points, an otice of imposition to Drill, Foundation as a pictured enging indications of PG, it was neverted in conjunction with the	now sizes, weights, and lengths of proposed casings; indicate mudding jobs, cemed all other important proposed work) The P-Mia, dated J-10-61, was approved for allefte-Public well. Because of sub-commercial dated and advicable to complete the be Bubste. This was done and reported on
e names of and expected depths to objective sands; she ing points, and extince of imposition to Drill, Foundation as a pictured engine indications of PC, it was neverted in conjunction with the	now sizes, weights, and lengths of proposed casings; indicate mudding jobs, cemed all other important proposed work) The P-Mia, dated J-10-61, was approved for allefte-Public well. Because of sub-commercial dated and advicable to complete the be Bubste. This was done and reported on
e names of and expected depths to objective sands; she ing points, an existe of imposition to brill, it wally completing as a pictured enging indications of PC, it was a provided in conjunction with the	now sizes, weights, and lengths of proposed casings; indicate mudding jobs, cemed all other important proposed work) The P-Mia, dated J-10-61, was approved for allefte-Public well. Because of sub-commercial dated and advicable to complete the be Bubste. This was done and reported on
s names of and expected depths to objective sands; she ing points, an otice of imposition to Drill, Foundation as a pictured enging indications of PG, it was neverted in conjunction with the	now sizes, weights, and lengths of proposed casings; indicate mudding jobs, cemed all other important proposed work) 1-30ic, detail 3-10-61, was approved for cliffo-factor well. Because of an expense of the case of the ca
s names of and expected depths to objective sands; she ing points, an otice of imposition to Drill, Foundation as a pictured enging indications of PG, it was neverted in conjunction with the	now sizes, weights, and lengths of proposed casings; indicate mudding jobs, cemed all other important proposed work) 1-30ic, detail 3-10-61, was approved for clifford and seemed to complete the balance adviceble to complete the language adviceble the language adviceble to complete the language adviceble the language ad
s names of and expected depths to objective sands; she ing points, an otice of imposition to Drill, Foundation as a pictured enging indications of PG, it was neverted in conjunction with the	and all other important proposed work) - Die, detail 3-16-61, we approved for eliffe-facts well. Because of experience the ballots. This was advicable to complete the public of the complete the compl
s names of and expected depths to objective sands; she ing points, an otice of imposition to Drill, Foundation as a pictured enging indications of PG, it was neverted in conjunction with the	now sizes, weights, and lengths of proposed casings; indicate mudding jobs, cemed all other important proposed work) 1-30ic, detail 3-10-61, was approved for clifford and seemed to complete the balance adviceble to complete the language adviceble the language adviceble to complete the language adviceble the language ad
e names of and expected depths to objective sands; she ing points, an existe of imposition to Drill, Nuclive completion as a pictured enging indications of PG, it was a conjunction with a count Form 9-230, deput 6-22-6	and all other important proposed work) 1-30ic, detail 3-10-61, was approved for eliffe-blacks well. Because of an experience the blacks. This was advicable to complete the pull 10 1961 OIL CON. CON.
e names of and expected depths to objective sands; she ing points, an ing points, an extisse of important to Brill, Nuclice of important as a pictured enging indications of PG, it managements in conjunction with a count Ferm 9-250, deput 6-22-6	wal in writing by the Geological Survey before operations may be commenced.
te names of and expected depths to objective sands; she ing points, an ing points are a plattured lengting indications of PG, it makes the conjunction with a conjunction with a count Form 9-250, deput 6-22-6	wal in writing by the Geological Survey before operations may be commenced.
te names of and expected depths to objective sands; she ing points, an ing points are a pictured to explications of PG, it is because in conjunction with a count Form 9-330, defined 6-32-6.	was izes, weights, and lengths of proposed casings; indicate mudding jobs, cemed all other important proposed work) - Ble, deted 3-10-61, was approved for cliffo-detect well. - Constant was advisable to complete the proposed was a reported to complete the proposed was a reported to complete the proposed work) - Constant was a reported to complete the proposed work of the proposed work) - Constant was a reported to complete the proposed work of the proposed work of the proposed work) - Constant was a reported to complete the proposed work of the
e names of and expected depths to objective sands; she ing points, an ing points and ing captured are an ing ing indications of PG, it is because from 9-250, detail 6-22-6 count from 9-250, detail 6-22-6	was izes, weights, and lengths of proposed casings; indicate mudding jobs, cemed all other important proposed work) - Ble, deted 3-10-61, was approved for cliffo-detect well. - Constant was advisable to complete the proposed was a reported to complete the proposed was a reported to complete the proposed work) - Constant was a reported to complete the proposed work of the proposed work) - Constant was a reported to complete the proposed work of the proposed work of the proposed work) - Constant was a reported to complete the proposed work of the
e names of and expected depths to objective sands; she ing points, an existe of important to Brill, it maily completing as a pictured egging indications of FG, it maneveres in conjunction with a count Form 9-330, detail 6-22-6	was izes, weights, and lengths of proposed casings; indicate mudding jobs, cemed all other important proposed work) - Black detail 3-16-61, was approved for cliffe-bases well. - Constant was a series of the complete the comp
