*Dear Sir:*

*This is to certify that the Tennessee Gas Transmission Company completed their #1 Gartner well located 890' from the North and 890' from the West line of Section 27-26N-11W on December 10, 1959.*

*This well was completed at total depth of 6138' for an absolute open flow potential of 9591 MCFPD through perforations from 5918-6080' in the Dakota Formation. This well has not yet been connected to a pipeline; therefore no production data is available.*

*Yours very truly*

New Mexico Oil Conservation Commission

1000 RIO GRAYSON ROAD

ALBUQUERQUE, NEW MEXICO

April 14, 1960

Mr. H. H. Anderson, Jr.  
P.O. Box 1900  
Durango, Colorado

Dear Sir:

It is to certify that the Compressor for Production Company completed their #1 Currier well located 290' from the North end of the road line of section 27-20-11N on December 15, 1959.

This well was completed at total depth of 6121' for an estimated open flow potential of 1501 MBPD through perforations from 5918-6040' in the lower formation. This well has not been connected to a pipeline; therefore, no production data is available.

Sincerely,  
John W. Smith

John W. Smith  
Commissioner, Division of Oil
