Re: Bradenhead Tests
William C. Russell, Graham #48
R & G Drilling Co., Lunt #65

L 10-27N-8W

Dear Mr. Russell:

Bradenhead tests were conducted on the above wells on August 10, 1970 and August 12, 1970. The test report indicates that a steady flow of gas was present on the bradenhead in each instance, although casing pressures recorded during the flow did not indicate casing failure. The amount of gas flowing was not indicated.

Will you please reschedule these two wells for retest in order that we may determine the nature and magnitude of the problem? Please have your representative, Mr. Dintelman, contact us, and we will have a witness present for the retest.

Thank you.

Yours very truly,

Emery C. Arnold
