(other) Perforated and tested Chacra Zone.

(Revised)

(NOTE: Report results of multiple completion or zone change on Form 9-330.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

1. Rigged up and pulled tubing from Dakota Zone.
2. Set bridge plug @ 6000'.
3. Pressure tested bridge plug and casing to 2000 P.S.I.
4. Perforated Chacra Zone from 3040' to 3050' with 11 holes.
5. Broke down perforations and frac'd chacra zone with 30,000 lb .20-.40 sand and 30,000 gel 1% KCL water.
6. Ran 93 joints of 1½" EUE, 2.90# tubing and set at 2985' R.K.B.
7. Swabbed well and tried to unload water.
8. Rigged down and moved.
9. Tried to unload water with nitrogen. Well would not flow.
10. Job completed 7-28-78

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.

GPO : 1976 O - 214-149

Previous Sundry Notice dated 5-28-82 reported that the work was done in 1980. Subsequent information shows that the work was actually done in 1978 prior to request for approval from USGS to do the work.

NOTE: This well was transferred to Southern Union Exploration Co. from Supron Energy Corp. on 1-1-81.
