17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting and proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

On May 16, 1989 work commenced on the above well. Tubing was pulled, the casing was cleaned, and a packer was set at 3840'. The tubing was swabbed with no recovery of water or gas. The well was then shut-in. In June of this year the well was found to have built a substantial amount of pressure and seemed to be capable of flowing gas in commercial quantities. We have notified El Paso that we want to produce the well. We are currently waiting on them to complete work on their meter.
