RE: ~~Graham #1A, P-04-27N-08W~~

Dear Mr. Vaughn:

As you are probably aware, an annual Packer Leakage Test is required to be run on all non-downhole commingled, dually completed wells in northwestern New Mexico. A recent review of our files reveals that your Graham #1A, P-04-27N-08W, has not been tested since 1982. I reviewed our files for this type of violation in 1990 and apparently missed this well. A Packer Test may be taken and filed at any time during a calendar year. Provided you conduct and file a test prior to January 1, 1994 and continue to conduct annual tests, you will not be penalized. If we do not receive a 1993 test, I will recommend your allowable for the Graham #1A be cancelled until you are in compliance and until further notice from this office.

Yours truly,

Charles Gholson  
Deputy Oil & Gas Inspector
