13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Operator has attempted to restore production from this well by installing a pump jack to remove the produced water. A wellhead compressor has also been installed. A re-stimulation is being considered. We ask that a long term shut-in be allowed until a replacement well can be drilled. Rachel 90 and 91 have been permitted. We are waiting on NAPI/Tribal surface clearance.
