## 13. Describe Proposed or Completed Operations

We request permission to flare gas from the subject well for a 6 month test. The well is currently making 30 to 60 MCFD and 30 to 60 BWPD from the Fruitland coal formation. It is not economic, but we are trying to dewater the coals to increase the gas rate to the point it is economic. We have up to 30 additional drilling locations that we are holding pending the success or failure of this test.

Our problem is that we are constantly being shut-in by El Paso due to high line pressure. We need to keep the well producing on a continuous basis so that we can complete the test over the next six months and leave ourselves enough time to complete the drilling program by the end of 1992. Therefore, we request permission to flare the gas.
