17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

The Fruitland sand was perforated from 414' to 478' with two shots per foot.
The zone was acidized with 250 gallong 15% HCL. No commercial production was achieved after swabbing.

We intend to plug and abandon by pumping 10 sacks cement down the 2 7/8" casing and displacing to the Fruitland perforation.

The area will be cleaned and returned to a condition consistant with requirements from the Navajo Irrigation Project.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
