13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

This well is being production tested with a compressor to help unload the hole and determine its commercial potential. This well has been logged off due to water invasion into the wellbore, which is why our Monthly Reports of Operations show no production. If the well can be unloaded and placed into production, this will be done. If the well appears non-commercial, we will further evaluate for recompletion or P&A.
