

Navajo #6 A
6-26N

November 3, 1978

Minerals Department
Reclamation Division
A 2088
Socorro, New Mexico 87501

Attention: Mr. Joe D. Rame
Division Director

Dear Sir:

We sent a letter dated October 25, 1978 requesting administrative approval to drill the Navajo Indian No. 6-A well on a non standard location due to topographical reasons. We failed to send copies of the topographical map with the application. We also failed to nominate the formations which we intend to complete the well in.

It is our intention to drill this well to the Blanco Mesaverde pool and formation. If there is a Pictured Cliffs zone of commercial quality in the well we will apply for a dual completion approval. If the logs show that there is not a commercial quality sand present in the Pictured Cliffs formation it will be completed as a single Blanco Mesaverde well.

We have attached copies of the topographical maps of this proposed location which is 2240 feet from the South line and 845 feet from the West line of Section 6, Township 26 North, Range 8 West, N.M.P.M., San Juan County, New Mexico.

Yours very truly,
SUPRON ENERGY CORPORATION

OFFICE OF THE DEAN
OF THE FACULTY

TO THE PRESIDENT AND BOARD OF TRUSTEES
OF THE UNIVERSITY OF CHICAGO

SIR:

I have the honor to acknowledge the receipt of your letter of the 10th inst., regarding the proposed changes in the curriculum of the Faculty of Fine Arts.

The Board of Trustees has been informed of the proposed changes and will consider them at its next meeting.

I am, Sir, very respectfully,
Your obedient servant,

H. D. HARRISON
Dean of the Faculty
