PROPOSED CASING AND CEMENTING PROGRAM

Dome Petroleum Corp. proposes to drill a cretaceous test to 1500'. Completion will be determined from logs. A 6" 900 series blowout preventer will be used. The BOP will be tested to 500 psi before drilling surface plug. The geologic name of the surface formation is Ojo Alamo. No abnormal temperatures or pressures are anticipated. Drilling should require approximately 4 days.

gre set elediated

IN ABOVE SPACE DESCRIBE PROPOSED PROGRAM: If proposal is to deepen or plug back, give data on present productive zone and proposed new productive zone. If proposal is to drill or deepen directionally, give pertinent data on subsurface locations and measured and true vertical depths. Give blowout preventer program, if any,

DEVELOPMENT PLAN FOR SURFACE USE

Dome Federal 24-26-13 #3

1450' FNL & 1190' FEL Sec. 24-T26N-R13W San Juan County, NM

#### 1. EXISTING ROADS

The main road to the location is that from Farmington toward Bisti, (Bisti Highway), leaving this road approximately 23 miles south of Farmington and using existing side roads to the location.

#### 2. PLANNED ACCESS ROADS

The access road, to be routed as shown on the attached map, will be 18' wide with adaquate ditch and water bars.

#### 3. EXISTING WELLS

Existing wells within one mile of location are shown on the attached topographic map.

### 4. LOCATION OF PROPOSED FACILITIES

Development of commercial gas production will require seperation facilities on the location pad. Equipment and pits will be fenced as required for protection of livestock and wildlife. Above ground facilities will be painted brown or grey to blend in with the surrounding area as specified by the BLM. The disturbed areas no longer needed for operations after well completion will be restored to natural contour and reseeded.

## 5. LOCATION AND TYPE OF WATER SUPPLY

To be hauled from El Paso Natural Gas Co. water pit at Chaco Gas Plant, approximately 3 miles east.

## 6. SOURCE OF CONSTRUCTION MATERIALS

Not applicable.

#### 7. METHOD OF HANDLING WASTE MATERIAL

All garbage and trash that can be burned shall be burned. All trash that cannot be burned will be contained ina trash pit and covered with a minimum of 24 inches of dirt. All drilling waste such as cuttings, overflows of oil, water and drilling fluids will be contained in the reserve pit and buried with adaquate cover upon completion of operations. The reserve pit will be fences until clean up operations are commenced. Toilet facilities will be provided.

#### 8. ANCILLARY FACILITIES

No camps or airstrips are proposed for this location.

#### 9. WELL SITE LAYOUT

See attached diagram.

#### 10. PLANS FOR RESTORATION OF SURFACE

Cleanup of the location will commence immediately following the removal of the drilling equipment. The reserve pit will be fenced until restoration operations are commenced. The location will be returned to original contour if the well is not productive. Both the road and location will be reseeded in accordance with BLM specifications.

#### 11. OTHER INFORMATION

Topography consits of rolling hills with very sandy soil. Vegetation is composed of Snake Weed, Mormon Tea, Yucca, Prickly Pear and Blue Gramma.
