SUBSEQUENT REPORT OF:

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

- 11/15/79, well was spudded & drilled to 109', 108.6' of casing was run & cemented back to surface using 35 sks of Class "B".
- 11/18/79, well reached TD of 1465' & was logged.
- 11/21/79, 1465' of 2 7/8" production casing was run & cemented with Econo fill, failed to circulate, cement top @ 1010'.
- 3/27/80, perforated P.C. formation from 1405-1409' & 1433-1436' @ 2 1/8".
- 3/28/80, acidized w/700 gallons & dropped (10) 7/8" ball sealers treated @ 950# @ 1 1/2 BPM.
- Tested well w/no shows.
- Squeezed perforations w/15 sks of neat. Set bridge plug @ 980'.
- Perforated @ 950' w/4 JS, 2 1/8" & broke circulation.
- Cemented w/100 sks of 50/50 poz mix, were getting cement returns to surface, dropped wiper plug & cement locked up. Pressured to 2000# but could not move it.

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing, pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.

Item 18: Describe proposed or completed operations (Clearly state all pertinent details including estimated date of starting any proposed work. If well is directionally drilled, measured and true vertical depths for all markers and zones pertinent to this work.)

Have evaluated economics of drilling out cement, as it is cemented to surface in the 2 7/8", costs would be prohibitive. Well is plugged & abandoned & marker will be set.
