13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The Irish 1J currently produces 3.6 mcf/d from a Fruitland Sand within the WAW Fruitland Sand-PC gas pool. The 160 acre spacing unit comprises the SE/4. Dugan Production Corp. completed the Irish No. 4 on 9-18-00 in the Pictured Cliffs Sand also within the same gas pool and spacing unit. The WAW Fruitland Sand-PC pool rules will not allow two wellbores in a common spacing unit. In order to test the Irish No. 4 into a gas pipeline, it is proposed to temporarily disconnect the Irish 1J, and use the existing gas sales meter for the Irish No. 4. Upon testing the No. 4 well, we will submit plans to bring the No. 4 and 1J wells into compliance with the pool rules.
