13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

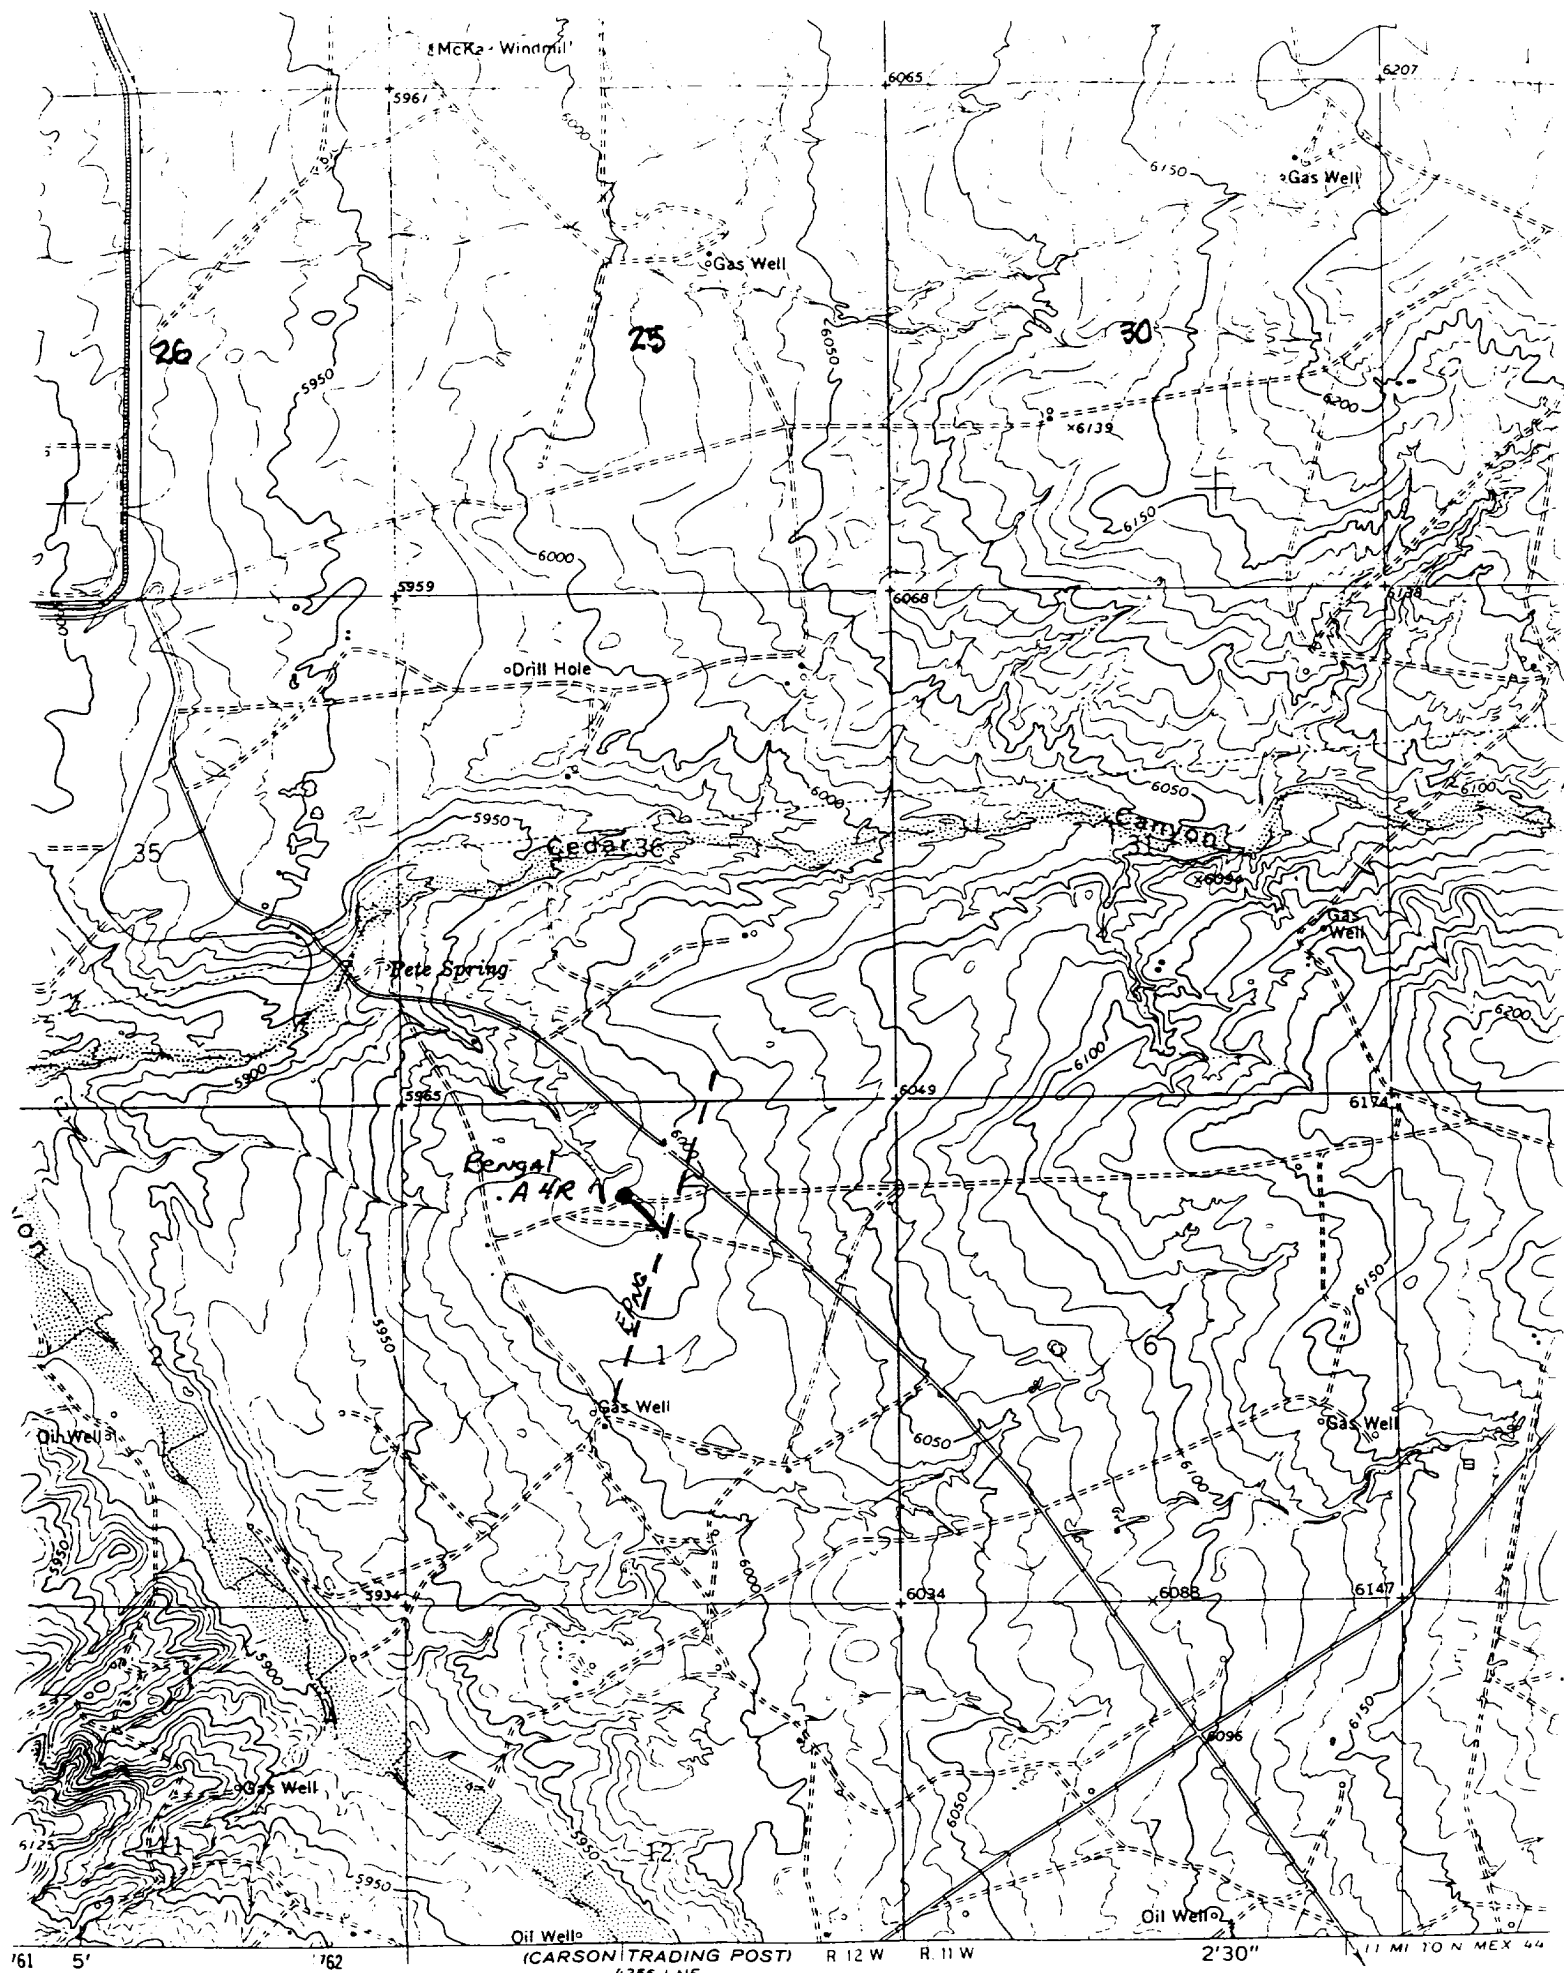

Propose to lay a 2" poly-pipeline from location (Bengal A #4R) to EPNG pipeline 650' south of location. The line will not impact any of the NAPI fields and it parallels black top road which is to the East of the proposed line. A meter will be set at the the EPNG tap not on the location. This work will take place on lease. The Arch. impact should be none, because of being in the NAPI Block survey. The pipe will be 2" black poly and will be tested at 100 psi for leaks. But will operate at approximately 50#'s.

Will tie into EPNG pipeline from well Nassau #6.
