☐ Altering Casing
☒ Other - &A Dakota
☐ Change of Plans
☐ New Construction
☐ Non-Routine Fracturing
☐ Water Shut off
☐ Conversion to Injection

13. Describe Proposed or Completed Operations

It is intended to recomplete the subject Dakota well to the Pictured Cliffs formation. A cement retainer will be set @ 6518' above the Dakota perforations. The Dakota perforations will be squeezed with 30 sx Class "B" or "G" cement (100% excess outside casing, 50% excess inside casing). A cement plug will be set in the casing from 3712'-3812' (5' ft above and below the top of the Mesa Verde). A cement bond log will be run and the casing will be pressure tested. The Pictured Cliffs will then be selectively perforated and fracture stimulated and 2-3/8" tubing will be run in the well.

The Dakota formation will be plugged and abandoned. Well will produce as a Pictured Cliffs only.

14. I hereby certify that the foregoing is true and correct.
