13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Plan to construct a natural gas pipeline to tie into J.P. McHugh Chaco Plant #12, which ties into the EPNG Lateral 10-A as shown on attached survey plat and topo map.

The line will be 2,307' of 3-1/2", SDR-7 polypipe. The entire line will be located on Federal Lease NM-12028 and Tribal Trust surface. Edwards Associates' line will be pressure tested to 100 psi. since it will tie into EPNG's low pressure system. There average yearly line pressure averages from 50 psi to 100 psi.

Navajo BIA clearance was approved ROW for the previous owner Nassau Resources in 1992, copy attached. Amendment is filed to change owner and type of pipe.

14. I hereby certify that the foregoing is true and correct

RECEIVED

RE: Cowsaround 22 #2 Natural Gas Pipeline, Nassau Resources,  
Inc., San Juan County, New Mexico EA-91-75

Dear Ms. Perrin:

The subject Environmental Assessment has been reviewed.

Based on the review, it has been determined that the proposed project will not significantly impact the human environment so as to require the preparation of an Environmental Impact Statement.

The enclosed "Finding of No Significant Impact" statement should be appended to the original EA and all copies prepared for distribution.

Sincerely,

ACTING Area Director

FINDING OF NO SIGNIFICANT IMPACT  
EA-91-75

Nassau Resources, Inc.  
Cowsaround 22 #2 Natural Gas Pipeline  
San Juan County, New Mexico

The proposed action consists of approving a 30 foot right-of-way for a proposed natural gas pipeline. The Cowsaround 22 #2 Pipeline will be approximately 2,307.31 feet in length. The proposed pipeline will be constructed by Nassau Resource, Inc. and is to provide a 3-1/2" pipeline system to transport natural gas from Nassau Resources, Inc., Cowsaround 22 #2 Well site to the Chaco Plant #12. The gathering system will be buried. The system is located in Section 22, T26N, R12W (NMPM).

Based on the review of the environmental assessment, it is determined that the proposed action will not have a significant impact on the quality of the human environment so as to require the preparation on an Environmental Impact Statement.
