13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Your letter dated March 30, 1992, requested a plan of action for the Sullivan No. 9. The well has been a long term shut-in waiting on an economic evaluation of surrounding Fruitland coal wells. Unfortunately, the performance of the offset does not justify equipping this well for production at this time. However, we are in the process of trying to sell the well to a party who is interested in bringing the well on line. We hope to have the sale consummated in the next few months. Therefore, we ask your permission to leave the well shut-in through August, 1992 to prevent plugging a well that might eventually produce.
