Swab/Production Test Well

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Rick Wells #2 has been shut-in pending a pipeline hookup since June 1993. In order to satisfy the Bureau of Land Management request (September 19, 1996), Universal Resources Corporation proposes the following:

1. Move in, rig up well service unit.
2. Run 2-3/8" tubing to  $\pm$  1450'.
3. Swab tubing to draw down water level.
4. Install orifice tester with chart to obtain flow test.
