13. Describe Proposed or Completed Operations (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once Testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

In July, 2000 SG pressure tested the casing prior to attempting to complete the well; found and repaired casing leaks. However, the casing inspection log revealed severe casing damage due to corrosion. SG is requesting a continuation of Temporary Abandonment status for this well until it can be evaluated, and a decision can be made whether to repair casing and complete the well or redrill.
