IN REPLY REFER TO:

NMNM-0560223 et al. (WC)  
3162.3-1 (07337)

April 25, 1995

Maralex Resources, Incorporated  
Attn: Mr. A. M. O'Hare  
P. O. Box 338  
Ignacio, Colorado 81137

Dear Mr. O'Hare:

References are made to your Applications for Permits to Drill (APD's) the wells listed on the enclosure. The referenced APD's are rescinded and returned, as requested by your letter of March 24, 1995. Any rescinded APD may be resubmitted at any time when definite drilling plans are formulated.

You are required to request surface rehabilitation instructions from this office if construction activities have occurred on any proposed drill site. If this office does not receive comment within 30 days, it will be presumed that no construction occurred. Later discovery that construction activities have occurred, may result in assessment of liquidated damages.

If you have any questions, please contact Mr. Errol Becher of this office at (505) 599-6358.

Sincerely,

*/s/ Ken Townsend*

~~This section is subject to technical and  
procedural review pursuant to 43 CFR 155.2  
and report pursuant to 43 CFR 155.4.~~

Maralex Resources, Inc. proposes to drill a vertical well to develop the Fruitland Coal Formation at the above described site in accordance with the attached drilling and surface use programs, exhibits, and Environmental Assessment Report.

As part of the NAPI Project, this location has already been archaeologically surveyed. A copy of the APD will be sent to Leo Soucup (NIIP) for archaeological clearance.

All of the access road for this well is located on this lease, so no separate right-of-way application is required.

Maralex proposes to tie this well to the El Paso Natural Gas low pressure gathering system at the closest point approximately 100' north of the borehole. This pipeline route is on lease. Maralex requests approval for this pipeline. See #12 of the Surface Use Plan and Plats No. 1 and No. 6 for details.

IN ABOVE SPACE DESCRIBE PROPOSED PROGRAM: If proposal is to deepen or plug back, give data on present productive zone and proposed new productive zone. If proposal is to drill or deepen directionally, give pertinent data on subsurface locations and measured and true vertical depths. Give blowout preventer program, if any.
