  Remedial Work

Detailed account of work done, nature and quantity of materials used, and results obtained.

Hole caved back from T. D. of 2068' to 1893' (175' cavings).  
 We pulled 1452' of 8-5/8" casing, placed 40 sacks cement on bottom with bailer, then filled hole to bottom of surface pipe with heavy mud, dragged out of reserve pit.  
 Filled surface pipe with 10 sacks cement.  
 Set 6' pipe and marker in cement.

I have not filled pits and leveled location because I am considering moving a rotary rig in, drilling out all plugs and taking this hole to basement.
