Title Oil and Gas Inspector Dist. #3.

Company El Paso Natural Gas Company

Address Box 997, Farmington, N.M.

OIL CONCENTRATION FACTORS

90-000714-1

1. The first step in the process of identifying a problem is to recognize that a problem exists. This is often done by comparing current performance with a desired state or goal. If there is a significant difference, a problem is identified.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The concentration of the *Agrobacterium* suspension was 10⁶ cells/ml (○), 10⁷ cells/ml (□), 10⁸ cells/ml (△), and 10⁹ cells/ml (◇). The data were the mean of three independent experiments. Error bars represent standard deviation.
