4/3/59	600	545		918	

Flow Rate = 239

Flow rate was manually reduced as desired.

Flow rate was reduced to test for packer leakage. ~~None observed~~ in this well.

After pressure was turned on with a lead weight gauge.

Pressure was plotted against time showing pressures of each zone plotted against time.

I hereby certify that the information herein contained is true and complete to the best of my knowledge.
