Well No. 4 is located 1080 ft. from S line and 1590 ft. from W line of sec. 26SE, SW, Section 26
($\frac{1}{4}$ Sec. and Sec. No.)23N
(Twp.)4W
(Range)N.M.P.M.
(Meridian)Wildcat
(Field)Rio Arriba
(County or Subdivision)New Mexico
(State or Territory)The elevation of the derrick floor above sea level is 7882 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well has been drilled to a total depth of 6335'. A considerable water flow and a low deliverability was found in the Mesa Verde section. It is intended to plug back and complete this well in the Pictured Cliffs formation as follows:

Set cement retainer at 5500', squeeze with 200 sacks regular cement. Set Novoo D.C. retainer at 4300', with 40' cement plug on top of retainer as additional plug.

Great Western Drilling Company Rig No. 19 is to be released and a drilling-in unit is to be moved over at a later date.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
