

OIL CONSERVATION COMMISSION

1000 RIO BRAZOS ROAD

AZTEC, NEW MEXICO

July 18, 1961

*Otto Hackel & Associates
401 Patterson Building
Denver 2, Colorado*

Attn: Mr. William W. Whitley

Dear Sir:

We have checked production records as requested by your letter of July 11, 1961 and find that the accumulative production through May, 1961 on the R.L. Bayless #1 Jicarilla well in Section 15-28N-1W is 1592 barrels. The well was first delivered in May so this represents May production. June production is not yet on file in this office.

We also have on file a Gas-Oil Ratio test filed July 7, 1961 showing that the well produced 71 BOPD on test, with a Gas-Oil ratio of 800 to 1. The allowable on this well is 70 BOPD.

So far as your question regarding production information and statistical reports I would suggest that you write the New Mexico Oil and Gas Engineering Committee, Box 127, Hobbs, New Mexico, Attention, Mr. William Vaughan, as their organization publishes production statistics. The Commission has this information on file in the Santa Fe and District offices but does not print and distribute it.

If we can be of any further service, please contact us.

Yours very truly

ECA:ks

*Emery C. Arnold
Supervisor, District #3*
