CASE RECORD

[illegible]

It is of the greatest importance to have a complete history of the well. Please state in detail the nature and location of the well, the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked," or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of charges used. If the well is to be used for water, state kind of material used, position, and results of pumping or bailing.
