October 22, 1953

Well No. 3 is located 1650 ft. from S line and 990 ft. from W line of sec. 14
N. 28 Section 14 23N 4W N.M.P.M.
 (Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wildcat Sio Arriba New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 7327 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

After setting 7" casing at 6031' and a 5" liner at 6423' a total depth of 6613' was reached. The natural gage was too small to measure and due to the wetness of the formation it was impossible to shoot the formation with S.N.G.

It is now intended to plug back to the Pictured Cliffs formation and perforate the casing opposite the Pictured Cliffs formation with bullets, 3 shots per foot, and test for production.

Verbal approval obtained for this work October 25, 1953.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
