13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

It is proposed to put this well back on production by attempting to isolate a suspected wet zone in the lower PC and then swab testing the upper PC as follows:

1. Set a plug between the perforations at 4028' and 4110' to isolate a suspected water productive zone.
2. Swab test perforated intervals above the plug to test the commerciality of the well.
3. If economically commercial production can be established, put the well on production. If not, an application to plug the well will be filed.

This work is scheduled in Conoco's 1996 work program.

14. I hereby certify that the foregoing is true and correct
