NEW MEXICO OIL CONSERVATION COMMISSION
PACKER SETTING REPORT

I-11-28N-7W

I, Charlie Dein, being of lawful age and having full
Name of party making report

knowledge of the facts hereinbelow set out do state:

That I am employed by El Paso Natural Gas Co. in the capacity of
Petroleum Engineer, that on April 7th, 1981

I personally supervised the setting of a Seal Assembly
EPNG Make & type of packer

in San Juan 28-7 Unit,
Operator of well Lease name

Well no. 74A located in the Blanco MV & S. Blanco PC Ext. field,

Rio Arriba county, state of New Mexico, at a subsurface depth of

3545' feet, said depth measurement having been furnished me by

Pipe Record;

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.

Charles H. Dein
