Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.) *

This well was completed July 3, 1954, producing 354 MCFPD after shot and frac, from Pictured Cliffs open hole 2164-2258'. Production has continued to decline and well has been uneconomical to operate for some time. Well was shut in during April 1975, producing only 3 MCFPD. Cumulative is 103,858 MCF.

It is planned to workover the well, however, at this time a workover is not economically feasible. Approval is requested to retain this well in its present status until such a workover is economically justified.
