RE: Supplements # NW 6910 and NW 6911

Dear Elvis:

The above captioned supplements apply to the A.N. Brown #4 McAdams, Basin Dakota Pool. They were issued to correct a mistake we had made regarding the dedicated acreage and apply to all allowables from February 1, 1961 through May, 1962.

The change in April Net Allowable is from 5394 over produced to 30,859 under produced.

The deliverability of the well is 261 MCPPD.

The well cannot produce enough to make-up the underage this period. How much time can we give the operator to recoup his allowable?

Will a hearing be required for an extension?

Yours truly,

A. R. Kendrick  
Petroleum Engineer, Dist. #3
